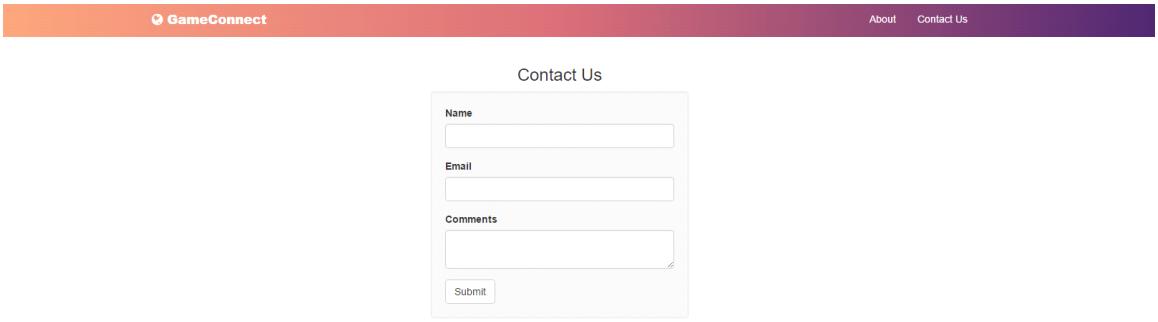
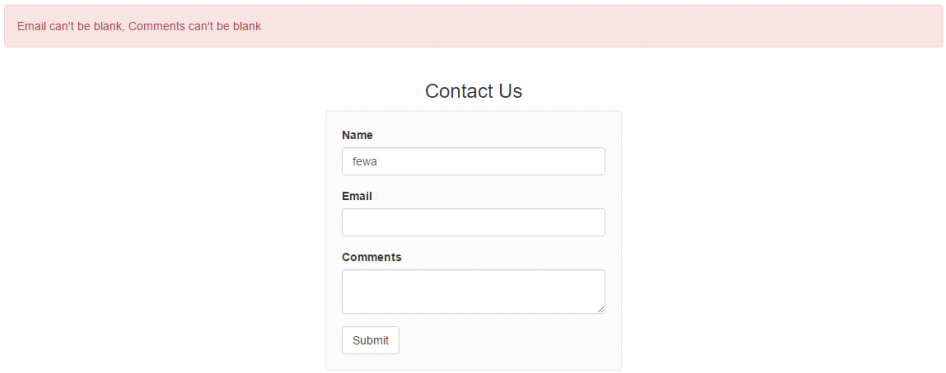
Week 2 Manual Test Plan for Mailer Functionality

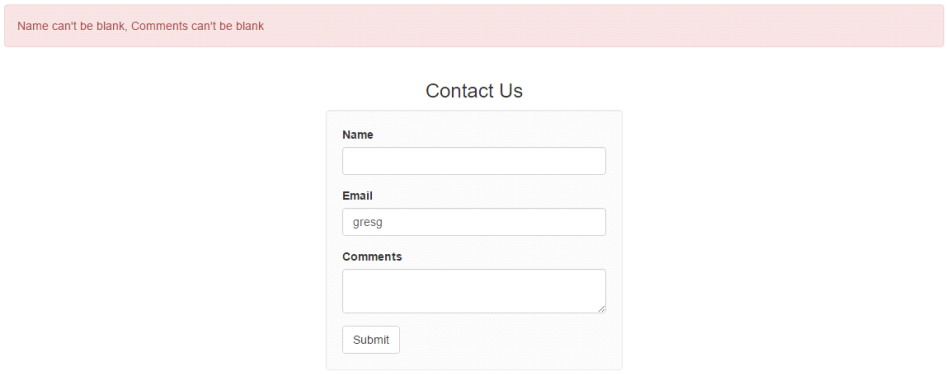
In this picture I start out with a blank form



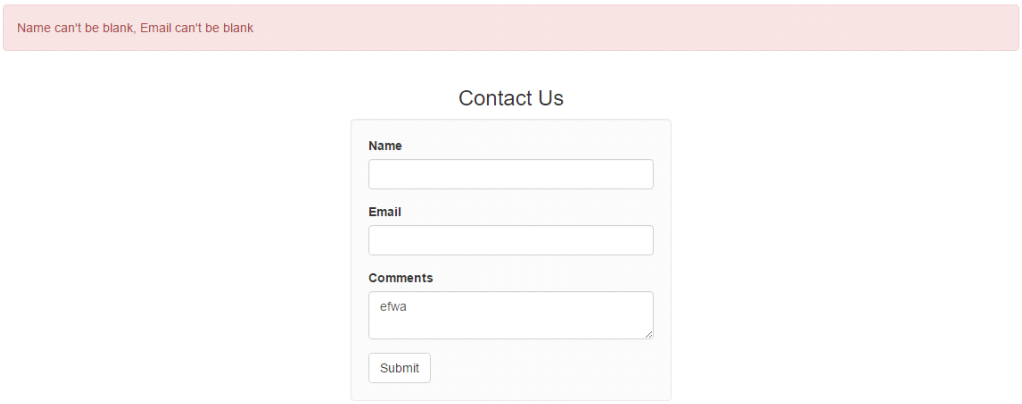
I made it so you have to fill out all 3 box to send a contact email to me so here are the test case and it will tell you what you are missing.



As you can see in the picture above, if I leave email and comments blank then the website will tell you that you are missing an email and comment.



In this picture above you can see that we filled out an email, but the website told you that you are missing name and comments



In this picture above you can see that I filled out the comments, but the name and email is missing.

The next three picture will showcase other scenario where a user that does not fill out all 3 box.

Comments can't be blank

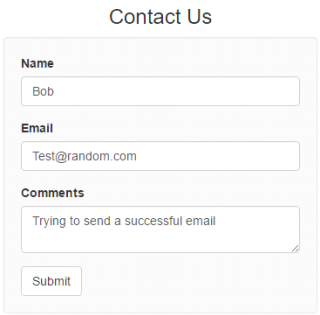
In the next few pictures I will showcase where email will be successfully sent.



Then when I fill out all 3 parts of the contact form it will correctly send a email to me and list a message saying the email was sent.

Message sent.
